Technology In Society

Subject/Title Index to Volume 16, 1994

Biotechnology
case in point for reinterpreting basic ideas in the new information age, 447
public perception in Spain of, 335
role of Eastern Europe in international strategic alliances for developing, 321

Competition; industry's role in improving the United States' competitive performance, 357
Construction industry, effects of global competition on, 199
Courts, science in the, 1
Culture and Development of Technology in Japan, 225

Decarbonization and dematerialization for environmental technologies, 139
Directions for Environmental Technologies, 139
Dual Use of Technologies, The: Concepts and Policies, 155

Eastern Europe, international strategic biotechnology alliances and role of, 321
Economics
industry's role in improving the United States' economic performance, 357
restructuring and privatization of manufacturing industry in Hungary, 35
strategies for dealing with the new techno-economic order, 97
technology policy for the post-Cold-War period, 121
Effects of Global Competition on the Engineering and Construction Industry: Management, Technology, and the Workforce, 199
Effects of Government Procurement on Industrial Innovation, 65
Energy; past and future of railroad propulsion technology, 301
Environmental issues and their relation to macro-engineering and civilization theory, 403
Environmental Performance and Technological Innovation: The Pulp and Paper Industry as a Case in Point, 427
Environmental technologies, future directions of, 139
Establishing Long-Term Science and Technology Goals: Providing a Vision for an Ecology of Games, 373
Europe; role of science and technology policies in regional economic development, 9

Genetic engineering, public perception in Spain of, 335
Global competition; effects on engineering and construction industry, 199
Global environmental issues and their relation to macro-engineering and civilization theory, 403
Global Interdependence of National Innovation Systems; Evidence, Limits, and Implications, 173
Government
role of science and technology policies in regional economic development, 9
technology policy for the post-Cold-War period, 121
technology policy in a complex world, 243
Government procurement; effects on industrial innovation, 65

Hungary; restructuring and privatization of manufacturing industry, 35

Industry's Role in Improving the United States' Economic and Competitive Performance, 357
Information Age and Its New Lexicon, The: Biotechnology as a Case in Point, 447
Innovation in the pulp and paper industry, 427
Innovation, industrial; effects of government procurement on, 65
Innovation, national systems of
global interdependence of, 155
in terms of industrial development, 313
International relations; a knowledge policy for peace beyond the universe of friend and foe, 289
International Strategic Alliances in Biotechnology: Where Does Eastern Europe Fit In?, 321

Japan
culture and development of technology in, 225
role of science and technology policies in regional economic development, 9

Knowledge Policy for Peace, A: A Release from the Closed Universe of Friend and Foe, 289

Large Technical Systems, Institutional Surprises, and Challenges to Political Legitimacy, 269
Law and science, 1
Lexicons; reinterpretation of basic ideas in the new information age, 447

Macro-Engineering and Global Environmental Issues, 403
Medical imaging industry, technological substitution and obsolescence of, 85

National Parks, Yellowstone's history and its effect on public policy concerning, 465
National systems of innovation, global interdependence of, 155
National Systems of Innovation: Selection Environments and Selection Processes, 313
New Model for Public-Private Partnerships, A, 389

Obsolescence in medical imaging industry caused by technological substitution, 85
Obsolete Moral Paradigms in the Age of Science, 479

Political legitimacy; large technical systems, institutional surprises, and challenges to, 269
Privatization and restructuring of the Hungarian manufacturing industry, 35
Public Perception of Biotechnology and Genetic Engineering in Spain: Tendencies and Ambivalences, 335
Public-private partnerships in United States, a new model for, 389

Railroads, Energy, and Business: Where Does the Future Lie?, 301
Restructuring and Privatization of the Hungarian Manufacturing Industry, 35

Science and technology, global interdependence of, 155
Science and Technology in Regional Economic Development: The Role of Policy in Europe, Japan, and the United States, 9
Science and technology policy described as an ecology of games, 373
Science in the Courthouse, 1
Scientific research, history of Yellowstone National Park and its effect on, 465
Spain, public perception of biotechnology and genetic engineering in, 335

Technological innovation and environmental performance, the pulp and paper industry as a case in point, 427
Technological Substitution and the Death of an Industry, 85
Technology Policy for the Post-Cold-War Period, A, 121
Technology Policy in a Complex World, 243
Technology-Trade Nexus, The: Liberalization, Warring Blocs, or Negotiated Access?, 97
Technology, utilitarianism as a response to the growth of, 479
Transportation; influence of railroads on development of countries, 301

United States
concepts and policies for dual-use technologies in, 155
new model of public-private partnerships for, 389
role of science and technology policies in regional economic development, 9
science and technology policy described as an ecology of games, 373
technology policy for the post-Cold-War period, 121

Utilitarianism as a response to the growth of technology, 479

Yellowstone's History: A Backdrop to the Nation's and the Author's Scientific Development, 465

Author Index to Volume 16, 1994

Alic, John A., 155
Apen, Paul G., 389
Ausubel, Jesse H., 139

Bellon, Betrand, 173
